

Residential Drainage Plan Requirements

For all residential property construction or expansion that raises the natural grade 12" or more, a site plan shall be included in the plan submission. The plan must include as a minimum, the following information:

1. A site plan showing center and each corner elevation at **natural grade**.
2. A site plan showing center and each corner elevation of **proposed finished grade with fill**.
3. Arrows depicting flow of drainage off the property.
