

Take time now to remove brush and trim trees around your property. Once a hurricane is headed our way the utility department will have many other priorities and may be unable to pick up brush. Visit the below link to find what zone you are in and when your brush will be picked up.

CHECK NOW START EARLY

If you plan to remove or cut back your trees make the effort now and get that out of the way.

Start early so you can make sure City workers will pick up your brush before the storm.

Limb removal can be dangerous so wear proper PPE and drink plenty of water.

Wind blown branches and debris can damage your house or vehicles.
