

The City of Ingleside has been experiencing an alarming number of clogged pumps at our sewer pump stations, due to an increase of foreign materials being flushed down toilets or poured down drains. In order to keep operational costs down, the City of Ingleside is asking all citizens to flush responsibly. The pumps are designed to handle water, human waste, and toilet paper only.

Examples of what should **NOT** be flushed down toilets are as follows:

Cloth rags or towels

Baby wipes, toilet wipes, towelettes, disinfecting wipes, or cloth wipes of any kind (even if the container indicates that they are “flushable”)

Paper (other than toilet paper)

Feminine hygiene products of any kind

Beauty products, Q-tips, dental floss

Plastics of any kind

Medications (prescription or over-the-counter. There is a medication disposal container available at the Ingleside Police Station.

Grease of any kind – especially cooking grease

Garden supplies (such as pesticides, fertilizers)

Paint, varnish, paint remover

Motor oil or gasoline
